

Firewalls Appliances for Smaller Networks

Businesses with smaller networks need advanced security with easy set up, configuration, and management. The challenge is to acquire these features on a limited budget. That's why Resilience developed the FCS series of firewall models: a highly economical solution offering advanced network security and solid support. The Resilience FCS models are Firewall appliances pre-loaded with Check Point's VPN-1 software and customized pre-hardened operating system, SecurePlatform. SecurePlatform combines the simplicity and built-in security of an appliance with the flexibility of an open server.

Benefits

- Best price/performance ratios in the industry
- Rigorously stress-tested for optimal stability and high performance
- Pre-loaded with Check Point SecurePlatform and VPN -1 or VPN-1 Power UTM software
- Delivered on Resilience highly reliable hardware

Highly Reliable, High Availability Appliances

Our purpose-built appliances deliver the highest levels of automation and security to lessen demands on IT staff, while also lessening costs and complexity:

- Highly Reliable and Highly Available
- Lowest-priced SecurePlatform appliances on the market
- Runs any Check Point application that runs on SecurePlatform
- Supports upgrade path to full system high availability, and unequaled appliance management and automation functionality of RES/OS

Best Price/Performance Ratios in the Industry

The Resilience FCS models are available at the best price/performance ratios on the market, making them the best value firewall appliances on the market today.

Check Point Software: Industry-Leading Security

The Resilience FCS series also provides the industry's most effective perimeter security with Check Point's VPN-1 Power Firewall/VPN application. Check Point's deep-packet filtering uses adaptive algorithms that stop new threats and variations before they compromise your network. Check Point VPN-1 Power with SmartDefense is proven effective against all of the SANS Top 20 threats.

Check Point's SecurePlatform is a customized and pre-hardened operating system combined with Check Point's VPN-1 firewall, optimized to perform tasks as a network security device. SecurePlatform combines the simplicity and built-in security of an appliance with the flexibility of an open server. Features include a first-time configuration wizard, Web GUI, increased security for multicast-application traffic, and simplified deployment of enterprise-class security on open servers. This comes on a hardened Red Hat Linux platform.

Resilience Support and Continuous Secured Ownership (CSO)

The Resilience FCS models deliver purpose-built network security appliances optimized to deliver the highest levels of firewall performance, loaded with Check Point's industry-leading security software. What could possibly make our firewalls more compelling?

Resilience offers comprehensive support plans with the most options and features available, so you can be guaranteed the right level of support for your organization. Resilience offers these support programs in conjunction with our landmark Continuous Secured Ownership (CSO) program.

Please contact us today to learn more about CSO and how it helps eliminate end-of-life costs and dramatically reduce the costs of upgrades.

About Resilience

Resilience delivers data security solutions with the deep automation and real availability demanded by busy IT departments for critical applications. Backed by the Resilience Continuous Secured Ownership warranty and industry-leading support, Resilience's high performance appliances deliver zero downtime, enable 15 minute provisioning and automation of key tasks like Monitoring and Recovery, and lower operating costs. Established in 1995, Resilience is based in Mountain View, CA. With 3 patents in high availability technology, Resilience solutions are installed in leading financial, aerospace, military and other organizations around the world.

FCS Series Technical Specifications

Model Number	05	20	30
Firewall Throughput	200 Mbps	800 Mbps	1.2 Gbps
VPN Throughput	85 Mbps	125 Mbps	350 Mbps
Rack Height	1 RU	1 RU	1 RU
Number of 10/100/1000 Ports	0	8	8
Number of 10/100 Ports	4	0	0
Number of CPUs	1	1	1
RAM	1 GB	1 GB	2 GB

Standard Features

- Convenient front-facing ports
- Easy pre-loaded software
- Check Point NGX or NG with Application Intelligence (licenses sold separately)
- RoHS compliant
- SSL network extender
- Rack mounting ears

Single Unit Physical Specifications

05

Height: 1.75" (4.4 cm)
Width: 16.75" (42.5 cm)
Depth: 9" (22.9 cm)
Weight: 10.5 lbs (4.77kg)

20, 30

Height: 1.75" (4.4 cm)
Width: 16.75" (42.5 cm)
Depth: 17" (43.2 cm)
Weight: 17 lbs (7.73kg)
